**TO WHOM IT MAY CONCERN:**

**SUBJECT: Recycled Content of Steel Products Produced by California Steel Industries**

California Steel Industries has no steelmaking facilities, and buys slabs from many sources around the world for conversion to finished products at our plant in Fontana, California.

Based on total slab tonnage purchased annually from all sources, the recycled content of the products we produce achieves at least 22% based on recent supplier activity. Actual scrap usage by individual suppliers may vary significantly, some well over 25%. However, we would anticipate that aggregate scrap utilization by our suppliers would typically average 5% for post-consumer and 17% for post-industrial (pre-consumer) content.

If you have further questions concerning this subject, do not hesitate to call us.

Sincerely,

CALIFORNIA STEEL INDUSTRIES, INC.
